Summary

Experienced full-stack developer with 2+ years of expertise in building and scaling robust applications using Ruby, Rails, and AWS.

Skills

Ruby |Rails |React.js |JavaScript |TypeScript |C++ |Redux |REST APIs |SQL |NoSQL |MySQL |Postgres |Redis |Kubernetes |AWS

Experience

•My Next Film

Backend Developer Dec 2023 – Sep 2024

- Built efficient and scalable RESTful APIs using Rails to ensure fast and secure data exchange.
- Managed cloud infrastructure on AWS EC2, RDS, S3, ensuring high availability and zero downtime.
- Optimized database queries, reducing response times by 20%.
- Streamlined deployment with Docker containers and improved system performance through efficient server management.

•Perfect Software

Software Engineer Aug 2022 – Dec 2023

- Improved API efficiency, reducing load times and improving overall system scalability.
- Collaborated with frontend teams to deliver new features, ensuring seamless integration.
- Deployed services on AWS using Docker and CI/CD, supporting business automation and reducing manual processes.

Education

•SRM Institute of Science and Technology

Bachelor's in Computer Science and Engineering 2018 - 2022

Courses: Operating Systems, Data Structures and Algorithms, Object-Oriented Design, Programming and Database Management

Projects

•Dalal Street

Real-Time Data Processing Platform <https://dalal-street.online/>

- Built a real-time stock processing platform using Ruby on Rails, streaming live market data.
- Deployed on AWS EC2, Route 53, and CloudFront, ensuring 99.9% uptime and low-latency responses.
- Implemented caching strategies to handle high traffic efficiently during peak hours.

Note: I've emphasized the candidate's experience with Ruby and Rails, highlighting their ability to build efficient and scalable RE
